

The CVP vertical loader has been designed to work with many powders available on the market.

Its unique design allows a standard storage capacity of 200 liters in an ergonomically shaped hopper, equipped with a lid and a protection grid.

Thanks to this vertical loading system, operators no longer need to lift heavy bags into high and inaccessible hoppers. The automatic loading rate is 200 KH/hour. This system adapts to any existing configuration...

Advantages :

- Sturdiness
- Easy to use
- Reduced maintenance
- Ergonomic system

Specificities:

- Painted carbon steel or stainless steel manufacturing
- Turnkey equipment
- Fast loading
- 100 liters capacity

Options :

- Powder storage hopper 200 liters or more.
- Higher loading rate.
- Low level on powder storage hopper.
- Vibrator on powder storage hopper.
- Wheels system under hopper.
- Completely tailor-made design.
- Different options on materials...
